

THE EXTENDED COLOR LIBRARY AT YOUR FINGERTIPS

Discover why CMF design teams around the world use ColorScala Selector to find the perfect color for their projects.

ColorScala Selector

From subtle pastel shades to dark metallics, ColorScala Selector provides access to a full range of 8000 coated samples to guide and inspire new color development.

This new-generation switch system fits inside two wall-mounted cabinets. It holds 125 color swatches, made up of 105 effect colors and 20 solid colors. All color samples are coated to ensure a perfect reference for any coating system required for your project.

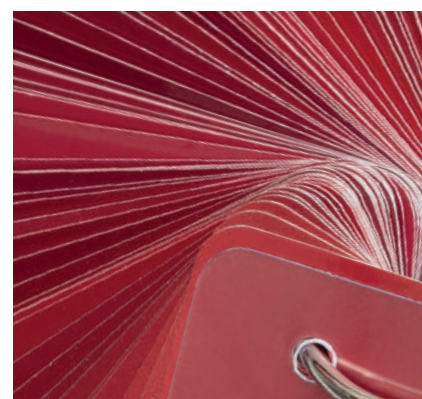

Based on a color-centric sorting system, each color is presented in an order that makes sense to the human eye, so you can quickly find the precise color you need.

Whether you want the coatings just as they are, or as a starting point for further color development, ColorScala Selector helps you define the direction for your projects, quickly and easily order the colors you need, and minimize development time.
